If so, you should belong to the Minnesota Utility Contractors Association

Our mission is to promote and serve the underground utility contracting community, including suppliers and support industries by providing safety training, certification, continuing education, scholarship and community service. In addition, we provide a range of advocacy work including State and Federal lobbying and regulatory work. This makes MUCA your front line of defense on issues effecting your business.

MUCA has a full time State Lobbyist providing our industry with the access and knowledge it needs to stay on the cutting edge of changes in regulations and laws. MUCA has an aggressive legislative program to bring more infrastructure dollars to Minnesota through both federal and state funding. MUCA's Political Action Committee also gives you a voice in the political arena helping to elect key decision-makers that are out there to help you in your business.

Our Association is on the forefront of your safety and training needs. We offer tailored training to your company as well as our core programming providing pipelayers certification, confined space and other required coursework for the industry. In addition to this core safety training, MUCA is expanding its training profile to provide utility construction-focused business training this coming year. Check our website for additional information on our new programming.

MUCA is working to expand our workforce in many ways. In addition to providing scholarship opportunities for our Member's children, we are working with state-wide institutions to expand the visibility of pursuing careers in the construction field. MUCA recently won a national grant to continue work on this very important investment for the future.

As a member of MUCA you will have access to our award winning quarterly magazine – *The Underground Press*, an annual directory of industry contacts, regular email alerts on key topics of importance to the industry, MUCA's Safety Library, Annual Conference and key events that provide networking as well as up-to-date information you need to know. The list is long, but the benefits are measurable. Our membership provides you with the ability to grow exposure in the industry, save money with safety, business and management training, and increase company profits.

Consider joining the MUCA team. Your membership dollars will show on your bottom line. Check us out at www.muca.org or give us a call at 651.735.3908 to learn more!

As a contractor member of MUCA, you will automatically be part of the National Utility Contractors Association team. This network of over 2,000 contractors, suppliers and manufacturers nationwide, including 40 state and local chapters, maintains a wide range of benefits, educational opportunities and services designed with you in mind.
